

I pay for satellite service to escape from overly commercial and corporate "local" stations. These pandering and controlling non-locally owned stations silence free speech all the time. One notable example is the refusal to play The Dixie Chicks, because they disagree with our current President. The thought that they can silence a superior service is as ridiculous as the USPS outlawing FedEx or UPS just because people are willing to pay more for their outstanding capacity. Please do not let them get their money grubbing hands on something I love...the freedom to choose what I listen to.
